Blue Ghost Paranormal Overnight Investigation on Saturday March 18

CORPUS CHRISTI – The USS Lexington has long been known for its paranormal activity, from eerie creaks and clanks and missing things to encounters with otherworldly beings. We invite the public to an overnight experience like no other at the USS Lexington Museum, where you will have the chance to hunt for the supernatural yourself.

This overnight investigation is open to anyone who is curious about the paranormal, from newbies who want to learn from our expert guide, Bill Miller, to experienced investigative teams.

The exploration begins as you are taken on a tour of six different sectors or "hot spots" on the ship, where you will hear the stories of "Charlie" and others, exactly where they took place. Overnight guests will be provided a berthing compartment, continental breakfast, and the opportunity to tour the ship in the light of day the next day.

Join us for a night of paranormal investigation, dedicated to those who served and may still be aboard...if you dare!
